To: Admissions Committee Date: September 2 2026
Applicant Name: Pedirati Dhruvanshu
Course/Program: Undergraduate Computer Science / Engineering

It is a great pleasure to write this recommendation letter in strong support of Pedirati Dhruvanshu's application for undergraduate admission. I have taught Dhruvanshu in his 12th grade Physics course during the 2026–2027 academic year. Among the many students I instruct, Dhruvanshu stands out as an exemplary scholar known for his deep conceptual understanding, grounded focus, steady perseverance, and exceptional academic consistency.

In our curriculum, Dhruvanshu has consistently performed at the highest level, securing 95% in 11th grade in Physics coursework, placing him squarely in the top tier of his class for foundational physics. What truly distinguishes Dhruvanshu is not merely his numerical performance, but his approach to learning. I have noticed that Dhruvanshu is rarely satisfied with simply memorizing a result, he wants to understand the physical reasoning behind it. He consistently seeks to master concepts through fundamental clarity and mathematical reasoning. Whether working through electrostatics, mechanics, or wave optics, Dhruvanshu visualizes the underlying physical mechanisms before tackling complex problems. His approach to learning reflects the same structured reasoning and intellectual independence that are particularly valuable in engineering and computer science. In the classroom, Dhruvanshu approaches his studies with self-directed maturity, meticulous discipline, and complete personal integrity. He displays a quiet, focused determination that reflects genuine intellectual curiosity rather than a search for superficial recognition. He engages thoughtfully with the subject matter to ensure a complete grasp of complex topics, demonstrating the critical thinking and resilience needed to welcome academic rigor as an exciting challenge.

I give Pedirati Dhruvanshu my highest and strongest recommendation for admission to your undergraduate program in Computer Science and Engineering. I am confident that his intellectual ability, analytical thinking, and character will make him a valuable addition to your institution
Sincerely,
